ABOUT ME

Enthusiastic and adaptable Software Engineering graduate with a strong foundation in full-stack web development, database design, and software engineering principles. Skilled in working under pressure, managing time effectively, and contributing to collaborative team environments. Quick to learn new technologies and passionate about solving real-world problems through code. Actively seeking an Associate Software Engineer role to apply my technical skills and grow as a professional in a dynamic development team

WORK EXPERIENCE

Junior Software Engineer | 2025 April - Present

NMA Software 1713 New Hyde Park Rd, New Hyde Park, New York, NY 11040

Tech Stack - Node.js, React.js, Redux, PostgreSQL, Bitbucket, aws s3, websockets

Work as a Junior Software Engineer building scalable web applications with Node.js and React, contributing to backend APIs, frontend features, and database-driven systems

Software Engineer Intern | 2023 September - 2024 September

Apps technologies (Pvt) Ltd. | No.23, Braybrook Street, Colombo 02

Tech Stack- Laravel,Php,JavaScript,Query,Github

Worked as a Software Engineer Intern contributing to multiple web-based projects using Laravel, PHP, and JavaScript

SKILLS

- **Programming Languages** - Java, JavaScript, Python, PHP, SQL, HTML, CSS, TypeScript
- **Frameworks and Libraries**- ExpressJS, ReactJs, Laravel, Bootstrap, Redux,web Sockets, NextJs
- **Technologies and Tools** - VsCode, Github, Bitbucket, Pycharm, IntelliJ, Aws, Ms Office 365 , Postman, Stripe, Paypal, Leaflet Map
- **Personal Skills** - Ability to work as a team, Self-motivated, Quick Learner,Work Under Pressure
- **Languages** - English ,Sinhala

EDUCATION

BEng (Hons) Software Engineering

2021-2025

Informatics Institute of Technology(IIT) Affiliated with University of westminster,UK

GCE A/L in Physical Science Stream

2020

St.Aloysius College (Galle)

Chemistry -c

Combined Mathematics -s

Physics - s

Projects

Fundraising Platform | 2025 December - Present| [Link](#)

- Developed a secure, multi-role platform for Creators, Donors, and Admins with full campaign management and admin approvals.
- Integrated **Stripe Connect** with Express onboarding, KYC, and automatic 5% platform fee per transaction
- Handled **AWS S3** media uploads and designed scalable **REST APIs** with **PostgreSQL**

Tech Stack - Node.js, Express, React, Stripe, PostgreSQL, AWS S3, Bitbucket

Carpool Management System | 2026 January – Present | <https://pickup.school/>

- Reduced school staff workload significantly by **automating** the entire student **pickup workflow** by replacing manual coordination with **real-time** dashboards for teachers and parents
- Built **geofence-triggered auto tracking**: parents are automatically tracked when entering the carpool lane and untracked on exit, eliminating manual check-ins
- Enabled real-time parent dispatch and live queue management –parent vehicles visible on **live map** with location refreshing every 10 seconds via **optimized, debounced** broadcasts, and dispatched students appear instantly on teacher dashboard.

Tech Stack: JavaScript, React.js, Express.js, Socket.io, PostgreSQL, CSS, Leaflet Map, Bitbucket

Instrumedent | Dental Service & Product Management System 2025-may- present

<https://instrumedent.com/>

- Built scalable backend for dental service & product platform with **Stripe, PayPal**, and **Venmo** payment integration, promo code handling, and LabRush expedited order management – secured with **JWT** authentication, Mailgun email verification, and role-based access control
- Implemented secure **AWS S3** uploads via **presigned URLs** – enabling fast, direct-from-browser large file transfers, significantly reducing upload time and eliminating server timeout issues caused by routing heavy files through the backend
- Developed **real-time** group discussion chat with **Socket.io** – supporting group creation, live messaging, typing indicators, and admin-controlled member management
- Contributed to frontend development building and styling pages using **React, Redux**, and **Chakra UI**

Tech Stack: Node.js, Express.js, PostgreSQL, React, Redux, Chakra UI, JavaScript, aws s3, bitbucket, Socket.io

Greenshield | Visually similar Plant disease detection and treatment suggestion system 2025

- Developed a web-based system that detects and classifies up to **38** plant diseases using **image processing** and machine learning
- Implemented features like user registration/login, image upload, disease prediction, and treatment suggestions
- The system can also identify **visually similar diseases** and suggest possible treatments with **99% prediction accuracy**

Tech Stack: Python, Flask (backend), React.js (frontend), Machine Learning, Image Processing (OpenCV), GitHub

Family Supermarket

- Developed a full-featured supermarket web app with admin/user roles, product management (CRUD), and dashboard for viewing product listings with pricing and stock levels
- Integrated shopping cart, search functionality, and Stripe payment gateway for secure online transactions
- Implemented authentication and role management using Laravel Breeze

Tech Stack: Laravel, PHP, HTML, CSS, Bootstrap, Stripe API, GitHub

EXTRA CURRICULAR ACTIVITIES

- Member of IIT Rotaract Club 2021-2022
- Member of Kensho Karate International

HOBBIES

- Watch Movies
- Play video games
- Weight Training
